In 1998 a couple of college buddies started talking about the vision they shared of running a business. They had worked in the “Corporate World” and were tired of it. In 1999 they started selling windows out of their garage, delivering them to the job site in a U-haul truck. This was the beginning of CDK Distribution. The facility that we are touring is CDK-Wichita and is the facility that manufactures their vinyl windows.
