

On Thursday, February 21, 2008 The Wichita Manufacturer's Association toured the Electromech Technologies facility located at 2600 S. Custer in Wichita, Kansas

*Founded in 1968, Electromech Technologies is a custom design and manufacturing facility specializing in electromechanical equipment. Electromech Technologies has the design, testing, manufacturing and overhaul capabilities to meet virtually all original equipment and aftermarket aerospace and defense specifications.*

**Their 42,000 square feet manufacturing facility in Wichita employs approximately 200 skilled workers.**

For more information on Electromech visit their website:  
[www.electromech.com](http://www.electromech.com)

**Following the tour, dinner and the business program were held at the Mabee Dining Center at Newman University. David Lippe, Managing Editor of Mid America Commerce and Industry Magazine spoke on the topic of trends and issues facing our region.**

**Thanks to Electromech Technologies, Newman University and David Lippe for providing another great WMA tour.**
